ROSETTA® SP Lithium Pressed Disilicate Ingots

Widely compatible with most popular products for investment material and glaze/paste for glass-ceramics, Rosetta® SP is increasingly gaining popularity in Australia as an alternative to current glass-ceramic ingots. With a superior strength of 460 MPa, Rosetta® SP ingots are simple and safe to use. Designed to recreate the organic translucency of natural teeth, Rosetta® SP meets the demands of age pursuing aesthetics. All ingot shades are available in A-D shades and bleach shades W1-W4, with three translucency levels (Low Translucency, High Translucency, and Medium Opacity).

(Order codes: HA_)

CEKA SITE BONDING COMPOSITE

Anaerobic bonding composite for fixing TITANAX retention parts and other titanium bases to be cemented to metals and zirconia. Set contents:

(Order code: CKSITE)

- 2 x 2 g composite
- 6 automix tips
- instructions for use

HYDROPLASTIC

Hydroplastic is ideal for custom impression and bleaching trays. It softens in hot water to a translucent putty. Comfortably handled for an extended working time and stays in place. Hydroplastic hardens to a tough, unbreakable plastic following a five minute bench set or, instantly in cold water. No mixing or polymerizing. Captures detail with accuracy, (Available in 460g packets) (Order code: TAK-1W)

PUTTY 'PERFIT'ION

Perfit C Silicone laboratory putty is used for the duplication of denture moulds, control matrix for the design of metal structures, impressions for copy denture technique, matrix for use in making temporary crown/bridges, matrix for the reproduction of gingival tissue, and the insulation of teeth/gypsum in flask.

- 2 kg w/ 1 x Catalyst (Order code: HU-C-SIL2)
- 5 kg w/ 2 Catalysts (Order code: HU-C-SIL5)
- 40g Catalyst (Order code: HU-C-CAT)

PERLA-DIA DIAMOND CUPS

Ceramic Diamond cup which allow easy access for marginal adjustments and polishing of cemented porcelain inlay, half crowns and laminate veneers.

(Order code: PERLAC7_)

ALPHAVEST S

Alphabond's very own speedy investment material is a high quality pressable ceramic suitable for all precious metal alloys. Phosphate bound and graphite free. Available in boxes containing:

- 144 x 60 gram sachets, and
- 2 x 1 litre liquids.

(Order code: ALPHAVESTS)

WAX BLOCKS

Our Wax Blocks are easy to apply, have excellent adhesion to the die stone, with a great machinable quality for smooth contouring on the die.

It has a high melting temperature (102°C) so it will not be affected or distorted when other waxes are applied over it.

(Order codes: HU-W98X_)

PMMA BLOCKS

Monolayer and Multilayer Disc Blocks were developed on the basis of a proven tooth material. Monolayer - The acrylic teeth material, combined with the advanced CAD/CAM modelling technique, produced for the CAD/CAM dental machine.

Monolayer blocks are made of the highly cross-linked PMMA material.

Multilayer - Multilayer Disc Block has four layers of different shade intensity. Multilayering ensures natural esthetic results, in particular when fabricating long-term temporary anterior restorations. Available in shades A1, A2, A3, A3.5 and sizes 98X14, 16 & 18.

(Order code: HU-P98X_)

STORE & CLEAN

A professionally designed kit to maintain and store dental appliances. With a sleek and understated

appearance it provides premium storage, and an ergonomically designed

brush with both medium and narrow head bristles. An organic non-abrasive formulated cleaning paste provides a gentle, yet thorough clean for fixed or removable appliances. (Order code: PROZKIT01)

PLATES & PINS

The Zeiser base plates and pins add to the scientifically proven accuracy the Zeiser pin drill one pour method has provided since 1980.

Available in white and terracotta.

(Order codes: Z13A (White-Sml), Z13B (White-Lge) & Z-576820 (Terracotta-Sml))

ZIRKING - BLOCKS

Zirking blocks made from 100% Tosoh zirconia. Premium quality at an affordable price!

The Zirking All-Ceramic Zirconia Block is used by dental technician in the lab and milling center for making dental restorations such as zirconia all-ceramic crowns and bridges.

Available in sizes: 98X12, 14, 16, 18, & 20 with 2 steps.

(Order codes: HU-ZX98_)
