

DO YOU NEED MORE STEAM?!

Reitel's STAR compact steam cleaner (3.5 litre), designed with a 4.5 bar pressure and temperature of 150°C to allow for excellent cleaning without any chemical additives. The cleaning does not affect the object itself.

(Order code: REIT14401)

GOLD, IT'S GOT THE POWER TO KNOW, YOU'RE INDESTRUCTIBLE

The Vanguard GOLD 2X is a 1-2 station dental dust collector from Vaniman for collecting dust and particulates. It has a powerful motor with adjustable speed control, along with replaceable filter bags. (Order code: V10346)

WHO DOESN'T LIKE GREAT FLOW!

The BEGO Gelovit 200 is a robust 240V 50/60Hz duplicating unit for optimum duplication. The brushless, programmable motor provides greater reliability than conventional motors, ensuring unsurpassed service life. Gel readiness can be pre-programmed for efficiency. With a special heating strategy, it prevents residue deposits and any nozzle blockages, thus maintaining that all important homogeneity. (Order code: BG26334)

SMILE LITE YOU MEAN IT!

The Smile Lite MDP2 Mobile Dental Photography Unit by Prof. Louis Hardan is the ultimate evolution in mobile dental photography! Now with a new extremely thin and sleek design.

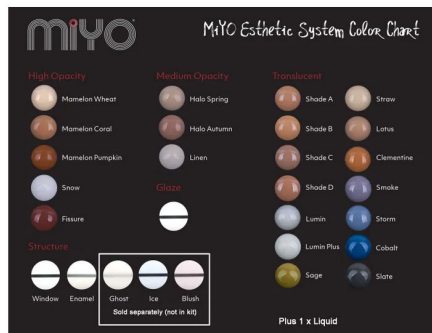

With the latest generation "Sun-Like" LEDs, the increased light power shines brilliantly for posterior shots. Integrated ergonomic handle/support. Available as a Master Set incl. polarizing filter and diffuser or as a Basic Set without. (Order code: SL-6700)

LIQUID CERAMICS ARE ALL THE RAGE

The Jensen MiYO® Liquid Ceramic System gives you the ability to create aesthetic restorations that rival natural teeth in an ultra-thin layer. Works with all zirconia and lithium disilicate in any laboratory or dental surgery.

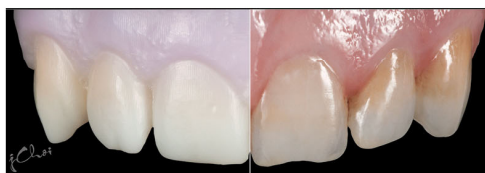

Replace your existing stain and glaze process or easily correct a shade and shape.

(Order code: J-MI993)

Jensen also offers you the ability to create depth, vitality and texture found in natural tissue with their MiYO® Pink Gingival System. With unprecedented thicknesses of 0.1mm-0.2mm, The Pink System comes with 17 self-glazing jars and 1 liquid (9 dense in opacity, 4 high translucent and 3 structure materials with 1 glaze).

(Order code: J-MI996)

THIS CROWN PLUS WOULD MAKE HRH SMILE

BEGO's ceramic filled hybrid 3D printing material for permanent restorations offers an accurate fit and smooth production with reproducible results. Print single crowns, veneers, inlays and onlays. Minimal sedimentation for easy handling, there's no mixing or shaking necessary. Available in shades A1, A2, A3, B1, B3 C2 and D3.

(Order codes: BG411_)

IT'S STILL THE ONE YOU WANT FOR LIFE

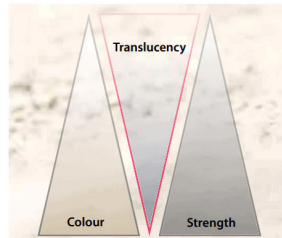

GC's new and improved feldspar-based **Initial IQ Lustre Pastes ONE** are versatile paintable ceramics with improved fluorescence for external staining, as well as internal characterisation of substructures. The unique 3D paintable ceramics bring an optimised level of fluorescence, depth and authenticity to all your precious works. Lustre Pastes ONE are fired with vacuum to enhance their aesthetic output, ensuring unsurpassed vitality and a natural glaze for all your restorations under all light conditions. With a new Lustre Enamel Effect – Opal, the incisal area gives off a dynamic opalescence for that natural appearance. (Order code: GC-877096)

SMILE LIKE AN EGYPTIAN

Introducing Bredent's **LUXOR Z True Nature** zirconia blanks - An elegant and seamless zirconium material developed specifically to put multilayering in the past!

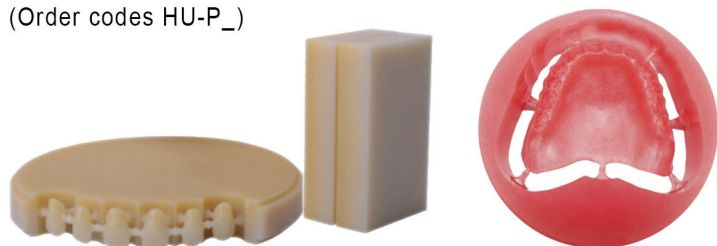

LUXOR Z True Nature is seamless in colour, strength and translucency gradations. In the cervical region, it offers up to 1100MPa and 750MPa in the incisal area. The cervical natural translucency ranges from 40 - 45% through to 50 - 55% in the incisal.

Available in multiple heights and shades as well as bleach. (Order codes: BR570-ZT_)

IT'S FUN TO STAY AT THE P.M.M.A.

Huge Dental PMMA blocks offer natural-like mono and multilayering with high flexural strength. They give excellent polishing performance after milling and come in a range of tooth shades, as well as pink tissue shades. The pink PMMA blocks have a crystal clear surface with outstanding translucency, dense structure and low water absorption. These blocks offer affordability and quality. (Order codes HU-P_)

SHINE BRITE TONIGHT

ZIRCON-BRITE is a solid diamond polish provided in a jar that can be used to polish all types of crown and bridge restorative materials.

ZIRCON-BRITE is unique in that it is the **ONLY** polish that will shine Zirconium to a high luster! Polishes in a matter of seconds!

Available in 40 grams. (Order code: DV-ZIRCON40)

YOU GOTTA KEEP 'EM SEPARATED

Print-Sep - The **NEW** wax-based separating agent from Bredent will separate the 3D resin from self-cured and heat-cured polymers. Rigorously tested and critically acclaimed by 14 laboratories during its development phase. (Order code: BR52000200)

ROCK OF THE AGES!

Its smooth **SCANNABLE** non-reflective surface and high durability makes trimming full models, ditching dies and scanning easy and reliable. (Order code: 331031)

Alpha-Rock Golden Brown is an exceptionally creamy, hard premium die stone.
