REVOLUTIONARY CHROME PRODUCTS FOR YOUR DENTAL NEEDS

BRUSHA, BRUSHA, BRUSHA

Brushes perfect for chrome cobalt. Extremely durable and powerful, these slender brushes reach all the right places.

(Top image) 65mm diameter short 10mm x 12mm narrow. Featuring 2 rows of grade 1 Chungking bristles with an acrylic hub and wooden centre. (Order code: R199-1000)

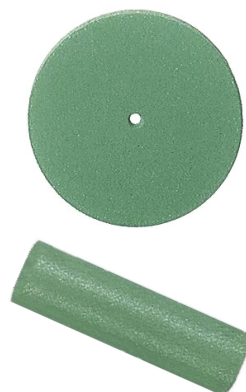

(Middle image) a slim, 44mm diameter, brush with an acrylic centre.

(Order code: R788-1000)

(Bottom image) Silver wire brush, doesn't remove surface, and gives a silky matte shine. 51mm diameter.

(Order code: R196-0000)

STEEL PROFI-SSIONALS

Flexible polisher for CrCo alloys with two grades of abrasiveness for optimally smoothing the surfaces of bridges, crowns and CrCo alloy denture bases. Wheels and cylinders, available in boxes of 100 pieces.

(Order codes: Wheels - E1401, Cylinders - E1423)

AGAR DO, DO, DO

Looking for an eco-friendly duplicating gel?

Wirogel's versatile agar-agar hydrocolloid investment will do! Universally useful - this impression investment guarantees your highest demands are met. Five-times less expensive than silicone without compromising quality of precision. (Order code: BG54351)

CAST-A-GEL HARRY

Special reversible duplicating hydrocolloid for sophisticated partial dentures, combination work and the acrylic casting technique. High level impression accuracy, even with the finest of details. Tear-resistant due to its outstanding elasticity.

This offers you the necessary reliability and precision in use. Available in a 6kg bucket.

(Order code: BG52052)

ARE YOU READY FOR THIS GELLY?

The Gelovit is an innovative preparation concept with temperature control which prevents clumping and guarantees the quickest possible preparation without burning. Always gives a consistent homogeneity.

(Order code: BG26334)

LA-LA-LA

Wironit-LA Chrome Cobalt - A trusted and reliable alloy in the partial denture and combination technique. With low thermal conductivity it provides high-wearing patient comfort.

Specially developed for laser welding, it is also biocompatible and corrosion-resistant. Available in 1000g.

HARDER, BETTER, FASTER, STRONGER

Wironit-extra-hard is the ideal partial denture alloy. Its high elongation limit and tensile strength is perfectly suited for combination work. The special biocompatible and corrosion-resistant composition with silicone and carbon gives outstanding casting properties. Very low thermal conductivity of the alloy also emphasises the wearing comfort of the prosthesis, and makes for a happier patient. Available in 1000g.

(Order code: BG50060)

HOW GREEN IS YOUR SILICONE VALLEY?

Two part duplicating solution with a 1:1 mixing ratio. Product features include high fluidity, excellent reproduction of detail and low linear shrinkage.

(Order codes: ALPHADUP_)

DEDECO-TED TO CHROME COBALT!

For finishing and polishing chrome cobalt and hard metals, these hard classic black rubber cylinders are always ready for you. Available in a box of 100 pieces. (Order code: DE4590)

Feel free to call us or check our website for the rest of our Dedeco product range!

SLA-Y WITH THIS TRITON

The Triton SLA wet and dry steam cleaner is an environmentally sound, intensive and versatile unit. With a fixed water connection and interconnected demineralisation cartridge, it minimises calcification of the unit. Featuring 3 bar (approx.) steam pressure, it's gentle yet thorough. Corrosion resistant with an insulated spray gun for maximum comfort. (Order code: BG26005)

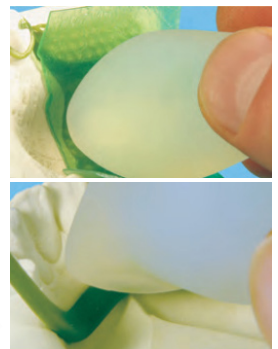

Korox® 250 sandblasting material is made from 99.6 % aluminium oxide. It not only removes investment material residues and oxides efficiently, it's ideal for surface conditioning with no risk of contamination to the alloy surface too. (Order code: BG46014 (8kg), BG54300 (20kg))

MR SANDMAN, SEND ME SOME KOROX

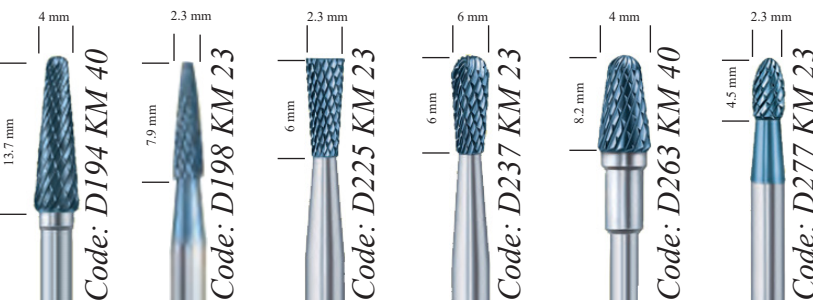

WAX ADAPTION LOOKS SO GOOD!

Quick and safe adapting of prefabricated wax patterns in the CoCr technique. Flat side for clasps, rounded side for plates or retentions. (Order code: BR36001205)

SMOOTHER, HARDER, AND LONGER LASTING!

Bredent's special diatit coating in the work area of these burs increases the hardness of the carbide to 3700 HV and reduces surface friction, while also extending their service life.

BACK TO BLACK

48mm diameter black brushes with a metal center for your lathe. (Order code: 36AP)
