

THE ALPHABOND REVIEW

REVOLUTIONARY PRODUCTS FOR YOUR DENTAL NEEDS

ISSUE 38/2024

PROSTHETISTS EDITION

SEIZE OUR KAIFENG AND MAKE THE MAIST OF LIFE

KAIFENG
Synthetic Polymer Teeth

MAIST
Synthetic Polymer Teeth

KAIFENG teeth are 3 layered double cross-lined acrylic teeth with outstanding wear resistance, anti-cracking, anti-stain and lower water absorption properties.

MAIST are high-performance 5 layered double cross-lined teeth, with the most outstanding properties: improved wear behaviour of implant dentures; lifelike layering in anterior with internal mamelons, and harmonized layering in posteriors.

Both *KAIFENG* and *MAIST* are available in the well known Vita® shade classification in a wide range of moulds. Buy in bulk and save!

RED-WHITE AND GUM!

Crea.lign® Red-White Aesthetics are impressive composites for permanent veneering of metal, ceramic and polymer substructures. Its elasticity and hardness adapt to various substructure materials. Crea.lign contains only nano particles and no ground glass fillers. Consisting of 50% opalescent ceramic fillers and a high-strength oligomer matrix. Crea.lign creates natural beauty with unsurpassed light transmission. Greater strength than ceramic and reliable, with a permanent chemical bond with all frameworks.

Individualise your restorations to achieve high-end aesthetics using the Crea.lign® GUM materials in the visio.lign® system.

GET MORE FIBER IN YOUR DENTURE

Reinforcing dental appliances can be a challenge for any technician. Metal reinforcements add weight, bulk, aren't great to look at, and their efficacy is doubted by many. FiBER FORCE® is a versatile system that can be adapted to address reinforcement needs in many situations. In many ways the uses of FiBER FORCE® are only limited by your imagination and the case at hand. Available in mesh (SYN08004), resin syringes (SYN0827) and braided rope in 1mm (SYN08001) or 2mm (SYN08002).

LIFT & SEPARATE

This acrylic and plaster separator ideal for prosthetic, orthodontic, and crown & bridge laboratories.

Providing the cleanest, easiest separation of acrylics from plaster and other gypsums available in the market.

STARLIGHT, SCOTCH-BRITE

Fiber Wheels manufactured from high quality Scotch Brite are the best alternative to emery-paper. Ideal for surface treatment of soft liner acrylics, mouth guards, thermoforming foils and plates, individual impression trays, denture acrylics, composite veneers, etc.

Ranging from Extra-coarse to Ultra-fine.

IT'S FUN TO STAY AT THE PMMA

HUGE Dental PMMA blocks produce an excellent finish with a bright surface, excellent shade stability and aesthetics. Monolayer blocks are made of the highly cross-linked material, while the Multilayer Blocks consist of 4 layers of different shade intensity. Multilayering ensures natural esthetic results, in particular when fabricating long-term temporary anteriors. Available in shades A1-A4 and Clear splints in 98mm diameters. (Ref: HU-P_)

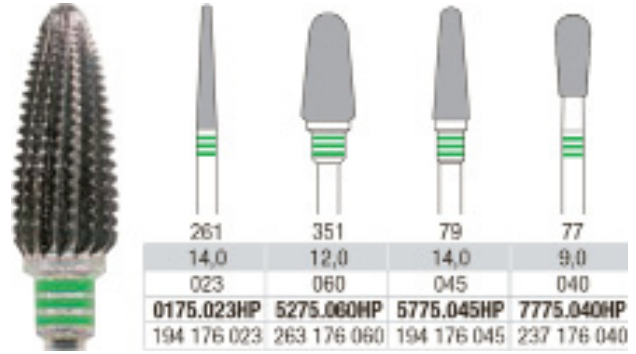

THIS LINK IS A BREDED LEGEND

Use visio.link for the preparation of the adhesive bond of composites:

- PMMA denture resins
- Composite (veneer composites/ composites teeth)
- High-performance polymers BioHPP PEEK/PEKK/PAEK
- 10ml. (Ref:BRVLPMM10)

LET'S GET PHYSICAL & TRIM

Designed for trimming soft acrylics and soft relinings, these traverse section tungsten carbide cutters will give you the quality and assurance Edenta products provide in your laboratory.

IT'S A LIGHT-CURING THING!

Light-curing plates for the production of custom impression trays.

100mm x 50mm x 70mm

50 pieces per packet

(Ref: CK95_)

NOW THAT WE HAVE YOUR RETENTION

Titanium anodized wire for incorporation into predrilled openings in denture teeth, providing retention in acrylic resin or composite. Formerly known as "Perma-Ret".

Set includes:

- 1 wire holder,
- 3 twist drills,
- 13 x 80mm long pieces of wire.

(Ref: C1041001)

Refills also available.
