PREMISE

Purpose of this operating manual issued by SIRIO DENTAL is to make any relation between the customer and the Technical Service Dept. easier, mainly in the view of providing the end-user with the directions for a correct and reliable use of the machine. Every unit is delivered with a copy of this manual and a careful observance of the directions contained herein is the basic condition to guarantee a perfect performance.

ATTENTION: the inobservance of the directions contained in this manual will give rise to an immediate discontinuance of the manufacturer's warranty provisions.

SHIPPING AND HANDLING

Unpack the items contained into each packing container with the utmost care. All the components of the polishing machine should be inspected at once, so as to make sure that no damage in transportation has occurred.

In case of damage, notify the manufacturer giving indications of the damaged parts.

GENERAL PRECAUTIONS

- Read with care this manual before attempting to start, service and/or performing any other operations on the machine.
- Operator and by-starter safety depend on the skilfulness, good judgement and caution in the use of the machine. Therefore, you would become familiar with the location and functions of all controls.
- The operator should be well trained and have attained a good knowledge and experience on this type of equipment.
- From time to time, inspect the parts that are subject to wear for condition and performance. Never tamper with the machine's electrical system.
- Whenever, for any reason the working process must be stopped, make sure that all controls are in a "neutral" position.
- The safety devices the machine is fitted with should be never removed or inactivated.
- Do not allow unauthorized persons to carry out repairs or service the machine.
- Never use gasoline, solvents, or other flammable compounds to clean the machine parts. Make use only of commercial non-flammable, non-toxic solvent-based cleaners.

RESIDUAL RISKS

Compliance with the general safety rules eliminates any residual risk in the use of the machines produced by SIRIO DENTAL, unless voluntarily caused by the operator.

TECHNICAL SPECIFICATIONS

Width	mm	340
Depth	mm	200
Height	mm	250
Rotation Speed	rpm	1400/2800
Net Weight	Kg	8.5
Power supply	Volt	220/240 V - Hz 50/60
Capacity	Kw	0.40
Ambient operating temperature	°C	10°C – 40°C

OPERATING INSTRUCTIOS

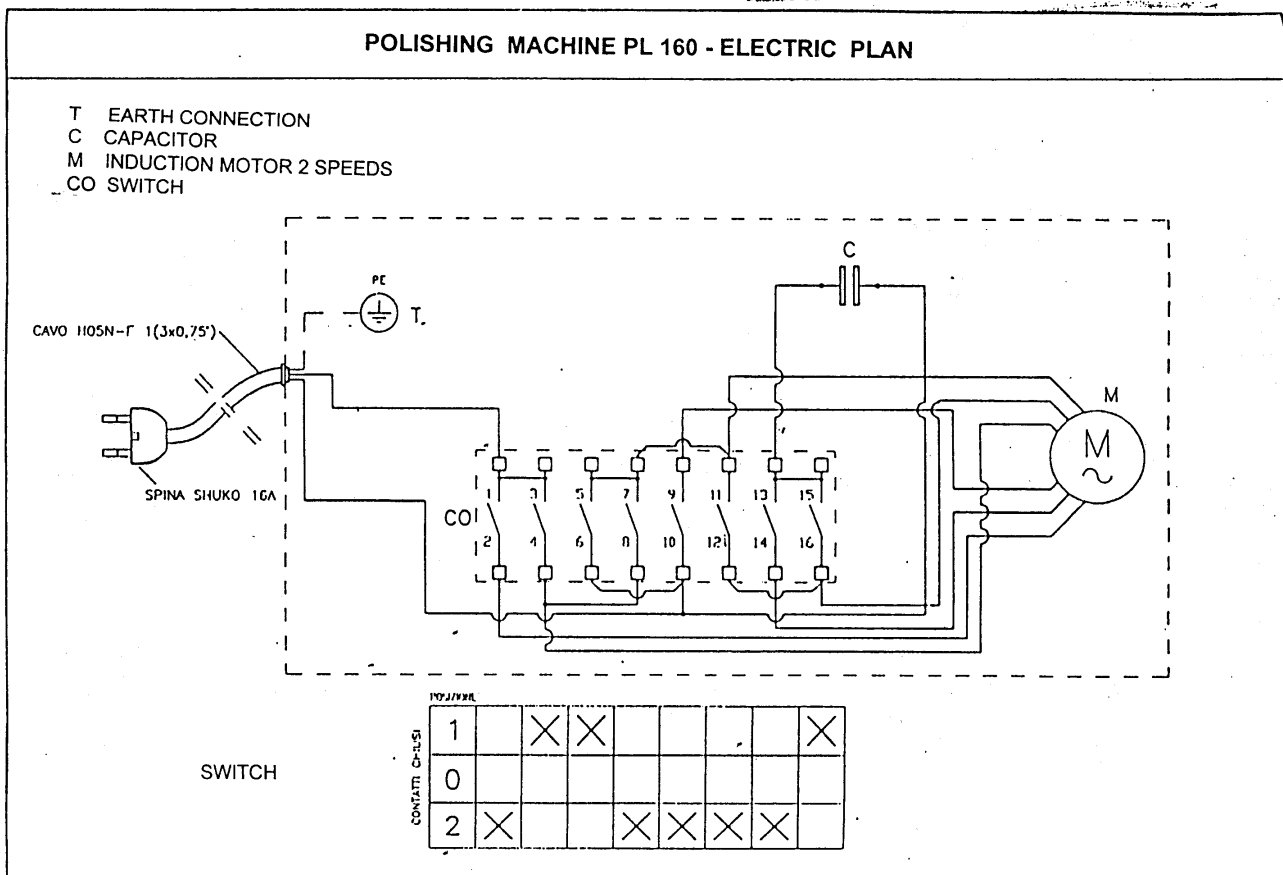

- Plug in the machine equipment (right-left) terminals, manually.
- Connect the machine electric power supply cable to the socket, after checking that the supplied voltage corresponds to the voltage as indicated in this manual and/or in the machine rating plate.

ATTENTION : do not get close to the machine with loose materials and/or ends. Failure to comply with this indication causes the risk of getting caught.

- Start the cleaning machine by the switch at its base.
