

XTREMELY MORE THAN WORDS CAN SAY

With Kulzer's new PalaXtreme range, you get high-impact strength, excellent handling characteristics and allergy friendliness. The "core shell technology" minimises the risk of fractures. This self-curing denture acrylic offers labs great flexibility, and it is just as easy to use, if not easier than conventional self-curing materials, whether you prefer the pouring or the injection technique. It's both strong and gentle at the same time. (Order codes: K6607_)

DORA WOULD EXPLORE THESE!

Upcera EXPLORE is a multilayer full contour zirconia that can be used for all cases. To produce this

new material it needed to meet four demands; anterior translucency for incisors, multilayer colour gradient, high strength, and high fracture toughness to resist chipping. Explore is aesthetics and strength in one. Available in different heights with steps, imagine the possibilities with no restrictions placed upon the technician, seize the opportunity to 'explore' these amazing blanks. (Order codes: UPC-__)

SAFETY FIRST IMPRESSIONS

A revolutionary disinfecting and cleaning fluid for alginate, polyether and silicone impressions. Only 3 minutes is needed to kill

bacteria, fungi and viruses. Highly concentrated, one litre of Cavex ImpreSafe equals 33 litres of ready-to-use disinfection fluid and it leaves no negative influence on the impressions. Refill liquids and bags also available. (Order code: CAV313021)

EXACLEARLY NOW THE RAIN HAS GONE...

GC EXACLEAR is an innovative, clear bite registration material made from silicone that fulfils the needs of demanding aesthetic cases and facilitates consistent results. Its absolute transparency offers total visual control, making it ideal for creating outstanding aesthetic results in complex clinical situations. With the perfect balance of properties for easy handling, fixed in place extruded by flowing nicely under pressure, giving you perfect adaptation and reproduction. For both chairside and laboratory use, its ideal injection moulding technique makes for clear stent fabrication of provisional and permanent restorations. (Order code: GC012793)

MORE, MORE, MORE, HOW DO YOU LIKE 'EM!

New colours have been introduced into the Noritake procelain range. Available in the ever popular EX-3 super porcelain and CZR ranges.

FOLKS, LET'S GET 'SIRIO'US

TRIMMING THE FAT

The SIRIO Wet/Dry Diamond disc model trimmer is built entirely of reinforced plastic which makes them very resistant to water, corrosion and shocks caused during its operation. A very powerful motor with high torque and an attractive compact design, makes it ideal for every working environment. It comes with a pipe to connect to the water mains giving you the freedom to trim all day if you want. Just don't forget to get a plaster trap (*which we also sell - code: BDT10001*) under your sink so you don't clog the drain. (*Order code: PL149*)

LET'S GET YOU VIBING!

SIRIO'S range of HERTZ Vibrators are powerful and reliable tools which guarantee considerable power. With an adjustable electronic circuit, all you need to do to change the vibration is press "up and down" on the front panel to control 9 levels of intensity.

Vibrators include a protection fuse, a standard plug, and a green light switch. Its rubber plane can be easily removed for cleaning, which can be done with steam, thanks to the high thermal and mechanical resistance of the rubber.

All three vibrators are noise-free and guarantee a high steadiness by means of a perfect vertical movement and thanks to four little holdfast feet which allow for sturdy adhesion to any type of surface. With a SIRIO HERTZ vibrator, you'll be grinning from ear to ear like a happy little vegemite.

(*Order codes: SR198, SR194 or SR192*)

LATHE-LA, YOU GOT ME ON MY KNEES, LATHE-LA

This slimline and compact lathe can be used in all your finishing and polishing processes of metal pieces obtained with castings. Simply attach any metallic or fibre brushes onto the protruding spindles and you're good to go!

The lathe performs at two different speeds: 1400 rpm and 2800 rpm. Thus, enabling you to select the appropriate speed to suit your needs. (*Order code: PL160*)

Also available as an optional extra are "Splash guards" otherwise known as hoods, which you place behind the brushes to gather any dust and metallic chips discarded in the process.

(*Order code: PL166*)
