

A SIRIO'US EDITION

MASTER BLASTER

A high-performance sandblaster that's extremely easy to use, operated with a foot control, it comes with a 12V internal light, a pressure regulator and an external aspirator connection. Weighing in at 16 kgs, this robust yet compact sandblaster might just be the perfect addition to your dental laboratory. Comes complete with two (2) tanks, one 50-100 um and one 10-250 um tank. *(Order code: SR922B).*

Also available in one (1) tank and three (3) tank versions upon request.

TRIMMING THE NIGHT AWAY!

The SIRIO Wet/Dry Diamond disc model trimmer is built entirely of reinforced plastic which makes them very resistant to water, corrosion and shocks caused during its operation. A very powerful motor with high torque and an attractive compact design, makes it ideal for every working environment. It comes with a pipe to connect to the water mains giving you the freedom to trim all day if you want. Just don't forget to get a plaster trap *(which we can also provide - code: BDT10001)* under your sink so you don't clog the drain.

(Order code: PL149)

STOP THE PRESS!

This hydraulic press can be used by any dental technician to mould mobile prosthesis.

The hydraulic press P400 is able to clamp up to 3 muffles and reach a maximum pressure of 400 bars, exerting on the muffles a force of 15000Kg. (150.000 N).

With an excessive pressure and in order not to damage the muffles, the working pressure must be limited to 200 bar.

The oil-pressure circuit is fully airtight and doesn't need any maintenance.

(Order code: P400)

GOOD, GOOD, GOOD, GOOD VIBRATIONS!

SIRIO'S range of HERTZ Vibrators are powerful and reliable tools which guarantee considerable power. With an adjustable electronic circuit, all you need to do to change the vibration is press "up and down" on the front panel to control 9 levels of intensity.

Vibrators include a protection fuse, a standard plug, and a green light switch. Its rubber plane can be easily removed for cleaning, which can be done with steam, thanks to the high thermal and mechanical resistance of the rubber.

All three vibrators are noise-free and guarantee a high steadiness by means of a perfect vertical movement and thanks to four little holdfast feet which allow for sturdy adhesion to any type of surface. With a SIRIO HERTZ vibrator, you'll be grinning from ear to ear like a happy little vegemite.

(Order codes: SR198, SR194 or SR192)

LATHE-LA, YOU GOT ME ON MY KNEES

This slimline and compact lathe can be used in all your finishing and polishing processes of metal pieces obtained with castings. Simply attach any metallic or fibre brushes onto the protruding spindles and you're good to go! The lathe performs at two different speeds: 1400 rpm and 2800 rpm. Thus, enabling you to select the appropriate speed to suit your needs. *(Order code: PL160)*

Also available as an optional extra are "Splash guards" otherwise known as hoods, which you place behind the brushes to gather any dust and metallic chips discarded in the process. *(Order code: PL166)*

LITTLE MIX

The INmix Mixer provides great in-vacuum paddle-mixing of coatings, plasters and alginates for dental use. Although small and compact, the INmix mixer has standard features includingment range (from the digital electronic Timer to the in-built oil-less vacuum pump, and moreover the exclusive mixing speed range from 100 to 500 rpm) which make this device extremely versatile and a must in any dental modern laboratory. The bowls are kept in place by the vacuum created inside which makes the device compact and easy to use. Standard accessory: medium bowl 500cc. *(Order codes: Table version - SR330T or Wall version - SR330W)*
